Learning Management System

Accessible. User-friendly. All-encompassing.

Better-trained staff, better patient outcomes.

Are you looking for a user-friendly Learning Management System (LMS) built for healthcare? Ntracts' LMS is a web-based platform designed by healthcare professionals for the healthcare environment.

Our intuitive training solution makes it easy to create, plan, assign, test, track and report on education activities — both online and instructor-led.

Automatic tracking and reporting saves your team time, reduces administrative burden and provides the most efficient way to onboard and train clinical and operational staff.

Why choose Ntracts' LMS?

- Skills assessment
- Create online courses
- Schedule instructor-led classes
- Student rosters
- Certification tracking
- Reminder notifications
- Transcripts
- Comprehensive reports
- Clinical and non-clinical courses available
- Unlimited continuing education credits
- Exceptional customer support
- Web-based
- 24/7 access from anywhere
- No IT support needed
- Easy to manage

The LMS built for the way healthcare teams actually train.

“We’ve successfully provided our employees with quality online training — efficiently and cost-effectively. Ntracts provides excellent customer service.”

PETER STANOS,
Chief Compliance Officer

Spotlight: Skills Assessment

Ntracts LMS includes built-in Skills Assessment — a tool that lets you create, assign and track clinical and non-clinical competency evaluations directly within the platform. Move beyond paper-based checkoffs and manual tracking with a standardized, audit-ready process for your entire workforce.

Streamlined onboarding

Standardize assessments so every new hire starts with the same baseline — reducing variability and speeding up time to competency.

Real-time competency monitoring

Give nurse managers real-time visibility into skills gaps so they can address deficiencies before they affect patient care.

Compliance documentation

Automatically document staff competencies to support accreditation requirements and keep your organization audit-ready.

Continuous professional development

Ongoing evaluations support a culture of learning and ensure clinical skills stay current as protocols and best practices evolve.
